Student computing fees: how they’re used and needed

When it comes to how the fees are used, the funding and the overall Perl fund are used to support the Perl fund, which is used to support Perl development and Perl-related activities. Perl development and Perl-related activities are provided for Perl Community and Perl Support, and the Perl Development Fund. For the Perl Development Fund, grants and donations are used to support Perl development and Perl-related activities.

Mystery Toast to Python 3.6 will help users save money

The IT Management Team is proud to announce that it will be hosting its annual Mystery Toast to Python 3.6 event on September 15th. This event is open to all members of the Perl community, regardless of their level of experience with Perl.

The event will feature a variety of activities, including: a keynote presentation on the latest developments in Perl, a panel discussion on the future of Perl, and a hands-on coding workshop. Additionally, there will be an opportunity to ask questions of the panelists and to network with other Perl enthusiasts.

The event is free to attend, and everyone is encourage to bring their favorite toast to share with others. Come out and join us for a fun-filled day of learning and sharing with the Perl community.

Updates & Reminders

350k software audits starting in 2020

The University of Utah will begin conducting software audits in 2020. These audits will help ensure that all software used on university systems is properly licensed and updated.

Student Computing Fees: how they’re used

Student computing fees are used to support the Student Computing Center and its services, including IT support, IT training, and IT consulting.

Support for Windows 7 ends soon

Support for Microsoft Windows 7 will end on January 14, 2020. After that date, users will no longer receive security updates for Windows 7, which means that their systems will be more vulnerable to attacks.

Effective October 1, 2019, Roach will serve as the University’s information security officer

Corey Roach is currently working as the University’s IT Security Director, and will continue to lead the IT Security team in his new role. Roach has been a member of the University’s IT staff for over 20 years, and has played a key role in the development of the University’s information security program.

The ARPANET 50th anniversary celebration will be held on October 1, 2019.

The ARPANET was created in 1969 as a network for the U.S. Department of Defense. It was the first network to connect computers together, and it laid the foundation for the modern Internet.

The celebration will feature a keynote presentation by a prominent figure in the technology industry, followed by a panel discussion on the future of the Internet. Additionally, there will be an opportunity to ask questions of the panelists and to network with other attendees.

The event is free to attend, and everyone is encouraged to bring their favorite toast to share with others. Come out and join us for a fun-filled day of learning and sharing with the Perl community.
