UIT will release a new user interface for the Campus Information Services (CIS) portal on Saturday, December 28, 2019.

The new interface will be used by employees* and address limitations of the current version of the CIS portal, which was introduced in September 2017. Specifically, the new interface will improve usability and reduce load demands on the portal during periods of peak use.

Below is a summary of changes:

**Keyword search**
This function will allow employees to quickly find specific tiles or groups of related tiles.

**Role-based homepages**
The new portal will feature a single page with sections organized to display related tiles.

**Tile organization**
Tiles will be displayed alphabetically within each section.

**Favorites**
Employees will be able to favorite tiles, which will appear in special section at the top of the homepage. Currently, users must build homepages of frequently-used tiles.

**Iconography**
Tiles will be smaller and icons will be simplified.

**Mobile support**
Tiles will display better on mobile devices, and CIS resources will be accessible without the need to adjust a device’s pop-up settings.

*Note: The Office of the Registrar has determined that students will continue to access campus information via the Student Homepage that is currently accessible through CIS. After initially accessing the new interface, students will have a tile that takes them to the Student Homepage. The Student Homepage will be augmented with some additional resources to provide access to things like the online Campus Map, library resources, uBox, etc.

If you have questions, your local IT support staff may be able to assist, or you may contact your respective central help desk: UIT Help Desk (801-581-4000, option 1) or the ITS Service Desk (801-587-6000).
